### **DETAILED ACTION**

1. Claims 1-20 of U. S. Application 10/647,596, filed 8/20/2003, are pending.

#### **Specification**

2. The disclosure is objected to because of the following informalities: please amend the specification (page 1) to include the serial numbers of the incorporated applications. Appropriate correction is required.

#### **Claim Interpretation**

3. It appears that "partial specifier" refers to the name for a generic library element, whereas "complete specifier" refers to each specific instantiation in the circuit corresponding to said partial specifier. This appears to be the normal naming convention in HDL and VHDL. If this interpretation is incorrect, please explain the distinction.

#### **Claim Rejections - 35 USC § 102**

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2128

3. Claims 1-20 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Hunt et al. (6,826,732).

4. Hunt et al. disclose an HDL file including configuration statements in sequence (fig. 4); partial and complete specifiers (col. 7, lines 40-55; col. 8, line 36 to col. 9, line 14. See generally col. 9-10; fig. 10, 22-23). The system is shown in fig. 8 – note # 800, 802, 804, 806, 808, 812, 814.
